

## Next Steps and Resources

Congratulations on finishing the core curriculum! If you're wondering what's next, this guide provides a jumping-off point for resources you may find helpful, as well as links to alternative version control systems and remote repository providers.

### **Free resource to learn more about git:**

Pro Git book:

<https://git-scm.com/book/en/v2>

### **Git alternatives for software version control:**

Mercurial (distributed version control):

<https://www.mercurial-scm.org/>

Subversion (centralized version control):

<https://subversion.apache.org/>

### **GitHub alternatives for remote repositories:**

BitBucket:

<https://bitbucket.org/>

GitLab:

<https://about.gitlab.com/>

---

If you have suggestions for great resources on software version control, please let me know so I can consider them for inclusion in this list.

And as always, if you have any questions about the material in this course, please send me a message or post in the Q&A section, and I'll do my best to help you out.

Many thanks, and happy programming!
